Glen's Gizmos

Outdoor School

A service from Glen's Hands-On Gizmos.

"developing reverence for life, and a passionate lifelong love of learning"

Glen's Gizmos Outdoor School

What is Outdoor School?

Outdoor School is a one to six day program for public, private and charter schools. Programming, housing and meals are provided. Students will be staying with volunteer counselors selected by their school in cooperation with Glen's Gizmos and around six other classmates. Cabin groups bond quickly so even campers arriving as strangers leave as friends!

Schedule

Each day will consist of three to six classes, arts and crafts, recreation (ex: boating, ropes course, hiking and archery), meal times, cabin time, campfires, skits, and a group activity in the evening.

Educational Approach

At Glen's Gizmos we take a holistic approach to education. Striving to help outdoor school students find identity, meaning, and purpose in life through connections with their community and the natural world.

Optional: Emphasis on Creation

For private Christian schools we teach students to search for the intricate details in nature that demonstrate the wisdom, power, and creativity of God. Rom. 1:20

Curriculum

Glen's Gizmos uses curriculum written on site by a professional teacher. Lessons align with the Next Generation Science Standards and are designed to challenge students while focusing on content that engages their natural curiosity.

Choosing a Camp

Our program travels throughout the Pacific Northwest. This flexible model means your school has options for both location and price.

The Paperwork

Traditionally outdoor schools require LOADS of paperwork including payments, registrations and health forms. We can simplify this for you by handling details through our online registration system. *Ask us for more information.*

Tailored Programs

At Glen's Gizmos we know each school and community is unique. We offer tailored programs and avoid a one-size-fits-all cookie-cutter approach to education. Contact us for a free consultation. Our directors will travel to your school and design a program meeting the goals of administrators, teachers and parents. This personal approach is what keeps schools coming back.

STEM Education at its Best...

and so much more!

Activities

- Hiking
- Boating
- Archery
- Camp Fires
- Silly Songs
- Team Building Initiatives
- High Ropes Course

Lesson Examples

- Dissections
